

**PRODUCT PERFORMANCE  
GUARANTEE**

## Faster, easier, and cleaner installations with NoLube® SIMpull THHN®.

Increase productivity and beat competitive pressures. NoLube® SIMpull THHN® from Southwire reduces installation time by an average of 30 percent in independent testing—and in real-world installations by electrical contractors coast to coast.

With Southwire's patented SIM Technology®, NoLube SIMpull THHN enables you to pull cable within allowable tension limits—quickly, easily, and without applying lube. That means you can:

- ◆ **Eliminate the need for lubricant**
- ◆ **Reduce the equipment needed in a typical cable pull**
- ◆ **Increase productivity**
- ◆ **Eliminate horse-collaring or bunching for reduced risk of nylon tears and damage during installation**
- ◆ **Eliminates potential hazardous job site conditions**
- ◆ **Identify cable and length easily**
  - Sequential footage markers have been added
  - Easy-to-read identification on SIMpull THHN jacket
  - Easy-to-see packaging identification
- ◆ **Rated for Sunlight Resistance in all colors**
- ◆ **Patented SIM Technology®**

### NoLube®

- No lubricant cost
- No calculating to choose the correct lubricant
- No extra setup and cleanup time
- No cold hands or cold-climate problems

**Eliminates bunching, reduces tearing**

**If your cable doesn't say NoLube, it's not SIMpull THHN.**

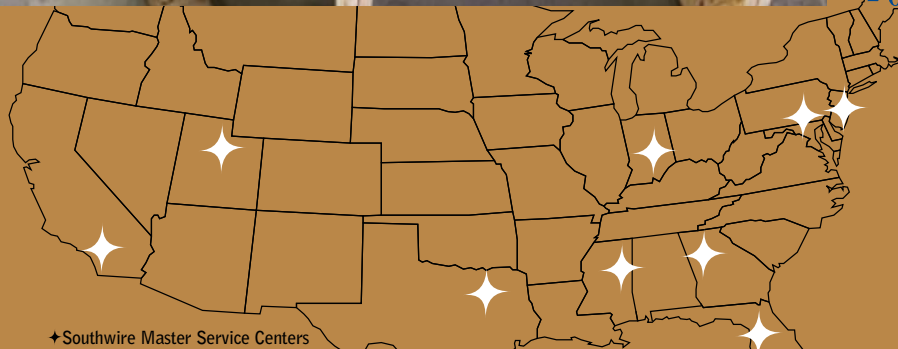

The techniques and precautions for ensuring a quality job are the same for SIMpull THHN as they are for old-style THHN. Just follow proper wire handling techniques. You don't have to do anything different—except skip every sloppy, time-wasting step lubing requires.

SIMpull THHN is available in black and colors in sizes 1/0 AWG through 750 kcmil (appropriate ground sizes also available). You can have it when and where you need it, because it's stocked in Southwire's nine distribution centers—which also offer complete cutting and paralleling of SIMpull THHN.
